

The future of our small planet is threatened by many challenges:

- By 2025, 2 out of 3 people will not have enough water for their basic needs.
- A billion people do not have access to clean drinking water.
- Polluted water affects the health of 1.2 billion people.
- Desertification affects over a billion people.
- Soil degradation affects a third of the world's land.
- 375 km² of forest disappear every day.
- Two billion people do not have access to electricity.
- 3.1 million people died from HIV/AIDS in 2002, 42 million are infected.
- 25% of the world population live in wealthy countries and consume 75% of energy.
